

A Review of When Bugs Were Big, Plants Were Strange, and Tetrapods Stalked The Earth

By Jack

I really enjoyed the book When Bugs Were Big, Plants Were Strange, and Tetrapods Stalked The Earth. I thought that it really gave you an idea of how the earth was in the time before dinosaurs. The facts were interesting, the jokes were funny, and it was easy to tell which was which. My favorite part of the book was the part about the giant bugs. They were really weird! There was one bug that looked like a giant squashed centipede, except it was 6 feet tall! I found this book very funny, interesting and informative.
